## Permanent Makeup

Permanent makeup is the art and science of implanting color into your skin. Because the color is placed in your skin and not on your skin, you will see a softer, more natural look.

I use a softap technique that involves applying the right color to the right place, allowing your natural features to be beautifully enhanced. The most common applications are to:

- Eyebrows - giving a thicker, fuller brow
- Eyeliner - both upper and lower lids
- Eyeshadow - to add color that highlights your natural beauty
- Lips - liner and fill.

A topical numbing is used to provide comfort during the application.

People of all ages who desire a soft, natural enhancement to their appearance can benefit from permanent cosmetic makeup.

## Micro-Current Facelift

Beautiful Image Facial and Body Sculpting is a procedure that involves the delivery of microcurrent into the face and body. Specially designed conducting wands are placed at specific acupuncture points to re-stimulate collagen and increase muscle tone. Some of the benefits include hydrated and revitalized skin, diminished or eliminated fine lines, creases and wrinkles.

The experience is described as wonderfully relaxing and euphoric, and causes no pain or swelling. The age-defying results are remarkable!

## Electrolysis

Electrolysis is the only FDA approved technique for permanent hair removal. It is recognized by Physicians and the American Medical Association. Hair can be successfully removed from almost any area of the body. Common treatment areas are eyebrows, upper and lower lips, and chin.

## Skin Imperfections

Electrolysis can successfully repair surface broken capillaries and Telangiectasias (red round spots). Skin tags can be easily removed through this process as well.
